Surveying, Mapping, Contractor,  
Urban and Regional Planning Services

# HI THERE!

---

CV. Arganusa Geo Plan is a company engaged in surveying, mapping, construction, and regional and urban planning services. We are committed to providing professional, accurate, and timely services through the support of experienced experts and the use of the latest technology. Our services include geospatial surveys and mapping such as topography, hydrography, and photogrammetry which serve as the basis for the planning and decision-making process.

In addition, we also serve the implementation of infrastructure construction projects with an efficient approach and in accordance with technical standards. In the field of regional and urban planning, we prepare spatial planning documents, feasibility studies, and provide regional development consultations based on local potential and strategic needs. We are ready to be a trusted partner for government agencies, the private sector, and other institutions in realizing sustainable and integrated development.

# ABOUT COMPANY

---

CV Arganusa Geo Plan is a professional service company specializing in surveying, mapping, building construction, and urban and regional planning. With a focus on precision, innovation, and modern technology, we provide comprehensive solutions to support accurate data acquisition and informed decision-making in development projects. Our services are designed to meet the needs of both government and private sectors by ensuring efficiency, quality, and compliance with technical standards.

We are committed to contributing to sustainable development through integrated spatial planning that is responsive to environmental, social, and economic dynamics. By fostering strategic partnerships and upholding high standards of professionalism, CV Arganusa Geo Plan continues to be a trusted partner in realizing well-planned, adaptive, and future-oriented infrastructure and spatial systems.

Rendica Calvin A.  
Commissioner

# WELCOME MESSAGE

"As the Commissioner of this company, I am proud to welcome you to our company profile. With a strong commitment to professionalism, innovation, and integrity, we strive to provide high-quality services that contribute to sustainable growth and long-term partnerships. Our mission is not only to meet the expectations of our clients but to exceed them by delivering reliable and forward-thinking solutions in every project we undertake. We hope this profile offers you a clear insight into our values, capabilities, and dedication to excellence."  
(Rendica Calvin A.)

"Welcome to our company profile. As the Director, I am proud to lead a team dedicated to delivering quality, innovation, and trusted solutions. We are committed to growing together with our clients through professionalism and integrity. Thank you for your trust and interest in our company." (Angga Kris Sahara)

# OUR VISION

## Vision

To become a leading and trusted company in the fields of surveying, mapping, construction, and regional and urban planning that is oriented towards quality, innovation, and sustainable development.

# OUR MISSION

---

## MISSION 01

Provide accurate, fast, and technology-based survey and mapping services to support appropriate planning and development.

## MISSION 02

Carry out construction projects professionally, efficiently, and in accordance with quality and work safety standards.

## MISSION 03

Maintain quality standards and work professionalism in every project to meet client and stakeholder expectations.

## MISSION 04

Develop regional and city planning that is responsive to social, economic and environmental dynamics in order to create sustainable spatial planning.

## MISSION 05

Building strategic partnerships with various parties, both government and private, to create synergy in the development of quality infrastructure and spatial planning.

# OUR SERVICE

---

## COMPANY

We provide professional services for corporations, government agencies, and property developers, including topographic surveys, digital mapping, boundary mapping, general contracting, and spatial planning. With the support of our experts and the latest technology, we ensure every project is executed accurately, efficiently, and in accordance with regulatory standards.

## INDIVIDUAL

For individuals, we offer surveying and mapping services, such as land measurement, land boundary legalization, and mapping for other personal needs. We also offer home design and construction services. These services are designed to be flexible and affordable, while prioritizing quality, accuracy, and speed.

# OUR PROJECT

---

## **SURVEYING AND MAPPING**

We provide accurate surveying and mapping services to support a variety of project needs, from topographic mapping and spatial planning to land measurement for development. Using modern technology and a professional team, we ensure the data we collect is accurate and reliable.

## **BUILDING CONSTRUCTION**

Our construction services encompass planning, construction, and supervision of construction projects. We prioritize quality, timeliness, and safety in every building, infrastructure, and other facility construction project.

## **URBAN AND REGIONAL PLANNING**

We assist in the design and planning of sustainable urban and regional development. Our focus is on creating well-organized, functional environments that meet modern planning standards, supporting economic growth and community well-being.

# MEET OUR TEAM

## **Rendica Calvin Ardiyanto**

A Bachelor of Engineering degree in Urban and Regional Planning with expertise in spatial planning, regional development, and urban planning. Experienced in designing sustainable and functional regional development concepts.

## **Angga Kris Sahara**

With over 10 years of experience in building engineering and mapping, he holds a degree in Building Engineering Vocational High School, a Diploma 1 in Geodetic Engineering, and a Bachelor's degree in Urban and Regional Planning. He is proficient in mapping surveys, land analysis, and targeted development planning.

## **M. Irfanda Fikri**

A graduate of a Vocational School of Electrical Engineering and a Bachelor of Engineering in Urban and Regional Planning, specializing in infrastructure planning, spatial planning, and regional utility systems. He possesses technical integration skills to support efficient and sustainable regional development.
